We are more than

A green contribution graph looks cool, and can help encourage you to build a daily coding habit. However, it is only a surface level indicator of how capable a developer is. Find out your true impact to OSS community using our developer first metrics that outline a true representation of a developer's ability.

Contributor Churn

The bus factor is a measurement of the risk resulting from information and capabilities not being shared among team members, derived from the phrase "in case they get on a bus and never return." Open Sauced alerts of possible contribution churn spreads evenly across contributors.

No more stale PRs

Sometimes getting your pull request reviewed, agreed upon, and approved feels like playing a game of tug of war with the reviewers. You end up discussing, changing parts of the code and at times having some healthy arguments too. So how can you avoid draining energy on pull requests?

The value of open source.

Damodar Lohani @LohaniDamodar
I was learning and contributing Appwrite's Flutter SDK, and later I got employed by Appwrite 🙌

v.vortex @VORTEX
contributing to @saucedopen helped me land a job at snyk! 🙌

Kent C. Dodds @kentcdodds
formerly jsangular-formly was attractive to a director at PayPal and helped him trust that I would be a productive remote member of the team.
